

To whom it may concern,

I have been a Klove listener and pledger for 7 years now. Our FM signal is 89.5. I would like to keep Klove just the way it is. Here in Great Falls, it has helped about 100 friends become Christians. I am a Christian myself for 28 years.

My church choir sings lots of the songs in our services every Sunday from KLove. Personally, when I have a bad or good day, I turn on Klove and instantly I feel calmer and can move on. There is always the right song on at the right time. If KLove was to be replaced with another station that plays any other kind of Christian music, many teenagers I know, would be listening to the rock, alternative, etc...kind of music which encourages drugs and violence. If KLove was taken away from these teenagers, they will be back to making wrong choices. What other Christian station or any radio station has a positive effect on teens?

As a special ed/elementary ed student here in Great Falls, I have seen how teens are influenced by negative music, and how listening to KLOVE's encouraging music affects them positively. These teens are the mentors for younger students and the ones who help the poor in our community.

Meth is an epidemic here in Great Falls and teens listening to KLove are the ones trying to make a change in peer's choice, as well as their own choices.

Klove serves public interest by saving 8000 individuals a day in this world and prevented a young girl in one of our middle schools from killing herself.

One man that went to the rescue mission here was suicidal and Klove playing in the mission, turned him back to the Lord.

As you see, replacing Klove would be detrimental to our community here. I cannot emphasize enough how important KLOVE is to Great Falls and its varied populace.
